Non-Emergent ER Diagnosis List*

Diagnosis not considered emergency situations.

Diagnosis:

Absence of both cervix and uterus

Aftercare following joint replacement

Aftercare following organ transplant

Aftercare following surgery for injury and trauma

Aftercare following surgery for neoplasms

Aftercare following surgery, NEC

Aftercare involving the use of plastic surgery (Plastic surgery following healed injury or operation)

Antibody response examination

Attention to surgical dressings and sutures, e.g., removal of sutures, change of dressing

Awaiting organ transplant status

Bariatric surgery status

Bed confinement status

Body Mass Index (adult or pediatric)

Care involving the use of rehabilitation procedures, e.g., PT/ST/orthoptic training

Contact with and (suspected) exposure to algae bloom

Contact with and (suspected) exposure to benzene

Contact with and (suspected) exposure to other hazardous metals - Chromium compounds; Nickel dust

Contact with and (suspected) exposure to other potentially hazardous chemicals

Contact with or exposure to other viral diseases, varicella, other viral diseases

Counseling for parent (guardian)-foster child problem

Counseling for parent-adopted child problem

Counseling for parent-biological child problem

Cystic fibrosis gene carrier

Do not resuscitate status

Donor expenses

Ear piercing

Encounter for administrative purposes, e.g., issue of medical certificates, issue of repeat prescriptions, and request for expert evidence, other specified or unspecified administrative purpose

Encounter for change or removal of nonsurgical wound dressing

Encounter for change or removal of surgical wound dressing

Encounter for fertility preservation counseling

Encounter for fertility preservation procedure

Encounter for hearing examination following failed hearing screening

Encounter for insertion of intrauterine contraceptive device

Encounter for removal of sutures

Encounter for testing of male partner of habitual aborter

Estrogen receptor negative status [ER-]

Estrogen receptor positive status [ER+]

Family disruption due to death of family member

Family disruption due to other extended absence of family member

Family history, Colonic polyps

Family history, Other digestive disorders

Fitting and adjustment of gastric lap band

Fitting and adjustment of intestinal appliance and device

Fitting and adjustment of other gastrointestinal appliance and device

Fitting and adjustment, Other device

Fitting and adjustment, Unspecified device

Follow up examination, surveillance only following completed treatment (all services)

Foster care (status)

Genetic susceptibility to malignant neoplasm, of breast, of ovary, of prostate, endometrium, genetic susceptibility to other disease

Hair transplant

Health supervision for newborn

History of Extracorporeal Membrane Oxygenation (ECMO)

History of fall/At risk for falling

Laboratory examination

Laboratory examination ordered as part of a routine general medical examination

Lack of adequate sleep – sleep deprivation

Long-term (current) use of aspirin

Long-term (current) use of insulin

Need for prophylactic vaccination and inoculation

Other elective surgery for purposes other than remedying health states

Other examination of ears and hearing

Other gene carrier status

Other genetic screening

Other genetic testing

Other laboratory examination

Other orthopedic aftercare, e.g., change, checking, or removal of Kirschner wire, plaster cast, external splint, other external fixation or traction devices

Other person consulting on behalf of another person

Other person seeking consultation without complaint or sickness

Other plastic surgery for unacceptable cosmetic appearance

Other specified housing or economic circumstances

Other suspected maternal and fetal conditions not found

Pediatric pre-birth visit for expectant mother

Person history, Infections of the central nervous system

Person history, Nephrotic syndrome

Person history, Other diseases of respiratory system

Person history, Pneumonia (recurrent)

Person history, Unspecified disease of respiratory system

Person history, Urinary (tract) infection

Personal history of (corrected) congenital malformations

Personal history of combat and operational stress reaction

Personal history of estrogen therapy

Personal history of failed moderate sedation

Personal history of immunosuppressive therapy

Personal history of inhaled steroid therapy

*An emergency medical condition is defined as "a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in:

- Placing the health of the individual (or, with respect to a pregnant woman, the health of the woman and her unborn child) in serious jeopardy
- Serious impairment of bodily functions
- Serious dysfunction of any body organ or part
