

Help your employees save
money on their medications with
Real-Time Prescription Benefits
and the **Check Drug Cost** tool

Overview

Real-time prescription benefits provides greater cost transparency for plan members and helps make it easier for them to afford their medications and stay on the path to better health.

CVS Health is committed to giving members the transparency they are looking for and helping them better understand their prescription benefit plan, their OOP costs, and if there are ways to save on their medications. We provide up-to-the-minute plan and cost information that is easily accessible, no matter where they are — on the go, in their physician's office, at their local CVS Pharmacy, or calling into Customer Care.

In our online tool, members can search a drug name and dosage and within a few seconds:

- Find out if the medication is covered and what they will pay out of pocket
- See up to five clinically appropriate drug alternatives covered by their plan and the price they would pay for each — they can then share this information with their doctor
- See if they can save by moving to a 90-day supply

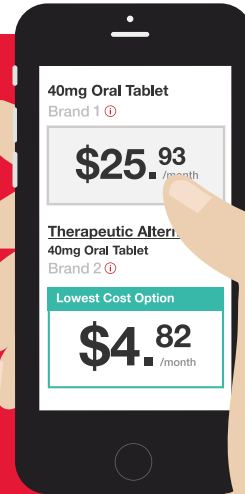

Unfortunately, many members do not know there may be lower-cost options they could talk to their doctor about. **That's where you come in.** We created a toolkit with materials you can use to educate your employees on the availability of this tool and encourage them to log on and see if they could be saving money.

The material in this kit can be **customized with your logo or co-branded with CVS Health.** Your Account team will work with you to determine which components you would like to use. They will then work with our marketing team to co-brand the material, as needed, and provide you with print-ready and/or PSD files so you can begin sharing this information with your employees.

Find lower-cost Rx options

with the Check Drug Cost tool from CVS Caremark®

Find out if you can save money on your medication.

Quickly check drug costs and see lower-cost options with the Check Drug Cost tool. All results are specific to you, your plan and where you are with your deductible.

Use the Check Drug Cost tool today at [Caremark.com](https://www.caremark.com) or the **CVS Caremark mobile app** to see if you can save money.

To get started, just type in a drug name and in a few seconds you can:

Find out what you'll pay out of pocket (you may pay the full cost of your Rx if you haven't yet met your deductible).

See a list of lower-cost options you can ask your doctor about.

See how much you can save by moving your Rx to a 90-day supply.

Go to [Caremark.com](https://www.caremark.com) and find out if you can save money on the medications you take regularly.

Your privacy is important to us. Our employees are trained regarding the appropriate way to handle your private health information.
